University of Nottingham
UK | CHINA | MALAYSIA

Role profile

Job Title	Associate Professor/Full Professor in Applied Mathematics/Statistics
School/Department	Department of Mathematical Sciences
Job Level	UNNC Scale B Level 6/7
Job Family	Research and Teaching
Contract Status	This post is available from September 2027 and will initially be offered on a fixed-term contract with the University of Nottingham Ningbo China for a period of up to five years. This contract may be extended based on mutual agreement.
Location	University of Nottingham Ningbo China
Hours of Work	Irregular working hours
Responsible to	Head of School of Mathematical Sciences

Purpose of role:

The successful candidates will be expected to deliver teaching to students and to supervise postgraduate research students. In addition, the persons appointed will be expected to conduct independent research, to play a leading role in the research activities of the School of Mathematical Sciences and to build a strong recognised research programme contributing to the existing academic landscape of the Faculty of Science and Engineering. It is also expected that the applicants appointed will contribute to the curriculum development of undergraduate programmes and take a fair share of administrative duties.

The detailed role profile will be provided once applicants are offered a specific level of appointment.

Person specification

The following specification is a minimum expectation of an academic in the Department of Mathematical Sciences. The detailed personal specification will be provided once applicants are offered a specific level of appointment.

	Essential	**Desirable**
Qualifications, certification and training (relevant to role)	▪ PhD in a relevant discipline.	▪ Higher Education teaching qualification or equivalent. ▪ Membership of a professional body where appropriate.
